**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

I. Claims 1-10, drawn to Face or End Mill, classified in class 407, subclass

53.

II. Claims 11-14, drawn to Process of Manufacturing Cutting Tools, classified  
in class 76, subclass 108.6.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the insert can be made by a different process such as a casting operation rather than using an abrasive disc.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
